DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 33 is rejected under 35 U.S.C. 102(b) as being anticipated by Somsel.

Somsel (US 5,764,333) teaches a method for obtaining data indicative of at least an outline of the eyeglasses have the steps of placing the eyeglasses for imaging (on a sheet of writing paper) and acquiring and displaying an image of the eyeglasses (tracing an outline of lenses of the eyeglasses) where the data (outline) is useable for shaping clip-on lenses (col. 3, lines 1-8). Any ancillary parts will be highlighted in the outline and inherently included.

Allowable Subject Matter

Claims 1-32 and 36-39 are allowed.

Claims 34 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claim 1, which include a method for imaging eyeglasses having the steps of placing the eyeglasses for imaging; acquiring and displaying an image of the eyeglasses using a short focal length imaging device; calculating and displaying an editable outline for each eyepiece of the eyeglasses, such that the editable outline can be compared to a respective eyepiece of the image; calculating supplemental locations associated with the outline for anchoring parts of an add-on unit; and providing data indicative of at least the outline and the supplemental locations; where the data is useable for shaping lenses of at least one customized add-on unit and manufacturing in a non-industrial scale the at least one add-on unit having, each, a size and shape that substantially matches the eyeglasses. In dependent claims 34 and 35 the manner of acquiring and displaying an image of the eyeglasses using either a short or long focal length imaging device is not taught or suggested in the prior art.

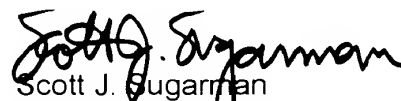

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
